SPACE REQUIRED.

**WELCOME TO
BORDERXPRESS™.**

FOR THE MANY, NOT JUST THE FEW

As the world's first self-service border control solution that accepts all passports and doesn't require pre-registration or fees, BORDERXPRESS™ is designed for the many, not just the few. And that goes for governments, too. BORDERXPRESS™ can be configured to meet the immigration needs of virtually any government in the world.

BORDERXPRESS™ FEATURES

- Accepts any machine readable travel document such as:
 - Passports, residency cards, trusted traveller program cards, enhanced driver's licenses and visas
- Retrieves travel information from:
 - A QR code or 2D barcode
 - Cards or mobile devices with tap & go
- Captures a traveller's facial, fingerprint and iris biometric information
- Performs e-passport authentication
- Performs traveller verification using facial matching
- Allows travellers to provide answers to government required questions, replacing paper arrival and departure forms
- Accepts debit, credit and tap & go payments from travellers for visas, excess duty and departure taxes
- Ability to integrate with a mobile border application so the kiosk performs only the biometric authentication of the traveller
- Allows for a traveller to provide flight/transit confirmation
- Configurable for border exit control

Hand baggage carts are available in the baggage carousel area after Canada Customs.
Cherries à bagages gratuits sont disponibles près des carrousel après le douane.

HOW BORDERXPRESS™ REDUCES WAIT TIMES BY MORE THAN 40% AND SPACE REQUIREMENTS BY 50%

BORDERXPRESS™ automates the administrative functions of border control with a two-step process that makes it faster and more efficient.

STEP 1.

Travellers complete the data-entry function themselves at the kiosk, which sends their encrypted information to a border control agency that assesses the data and returns a government response in seconds.

STEP 2.

A border officer verifies the documents. This additional step provides governments with an enhanced level of safety and security, as compared to competing technologies, as a border officer will always have the final approval to allow a traveller into the country.

BUILT BY AN AIRPORT FOR AIRPORTS

Vancouver International Airport (YVR) developed BORDERXPRESS™, where using technology to improve the travel experience (like reducing wait times) is one of the things we do best. YVR takes an entrepreneurial approach to innovation, exporting our expertise and systems to other airports across North America and around the world.

Everyone wins. Travellers. Partners. And the travel industry.

AN END-TO-END SOLUTION

- Kiosk design
- Software development
- Configurability for local requirements
- Integration with border control backend systems
- Integration with local flight/transit confirmation services
- Layout and queueing expertise
- Deployment
- Training services
- 24/7 worldwide help desk support
- Multiple languages

* From airport statistics

PROVEN IN NORTH AMERICA, READY FOR THE WORLD

YVR is the world's largest provider of non-registered self-service border solutions. We have over eight years of experience in kiosk design, kiosk user experience, kiosk layout and flow analysis and continuous improvement for automating border control at airports across North America.

Our technology is currently in use at 26 airports and seaports across Canada, the United States and the Caribbean, serving more than 80 million travellers at over 750 kiosks. We are ready to share our proven solution with the world. Are you ready to share it with your travellers?

CAPA Centre for Aviation has named Vancouver Airport Authority's BORDERXPRESS™ self-service border solution the 2015 Airport Innovation of the Year, recognizing the impact of YVR's industry-leading border clearance solution on the travel experience at airports around the world.
