

SOUTH RUNWAY MAINTENANCE

Vancouver Airport Authority is responsible for ensuring that the runways and airfield remain in excellent condition to provide for safe aircraft operations.

Commencing November 7, 2012, the Airport Authority will be closing the south runway (Runway 08R-26L) for *one night per month* in support of critical maintenance works on the runway and on runway supporting systems. Monthly dates scheduled for closures are as follows.

2012	
November 7	December 5

2013	
January 2	February 6
March 6	April 3
May 1	June 5
September 4	October 2
November 6	December 4

This work will require the closure to occur between the hours of **10:00pm and 6:00am**. During these hours, landings and take-offs will be moved to the North Runway to allow maintenance crews to access the work areas. The Airport Authority acknowledges that some communities may be disturbed by the changes to runway usage during the closures; however, this work is necessary to maintain a high standard of safety for the travelling public.
